THE NEW DEXTER 635

THE SPACIOUS ALTERNATIVE FOR LEISURE SPORTS

– PAGES 9 AND 13

IMPORTANT **INFORMATION** REGARDING **VEHICLE WEIGHTS**

Since each vehicle in drive mode is only permitted to exhibit an overall weight defined by the manufacturer, weight-related specifications are particularly important when purchasing a motorhome or van. This is especially true when choosing packages and special equipment that is installed at the factory. It must be kept in mind that the overall weight permitted in road traffic may never be exceeded while driving.

The information below is therefore intended to make configuring your vehicle easier and explain the legal requirements relating to vehicle weights. Please read all of this information carefully before starting your vehicle configuration process and contact your dealer if you have any questions.

1. The technically permissible overall weight

The technically permissible overall weight in a laden state can be found in the technical specifications for our motorhomes and vans, as well as in the configurator. This figure represents the overall weight defined by the manufacturer that the vehicle must not exceed while driving. Otherwise, in many European countries, including Germany, fines may be issued. Since you as the driver of the vehicle are responsible for complying with the technically permissible overall weight, we recommend that you check your vehicle before every journey and weigh your vehicle before setting off.

2. The weight in the ready-to-drive state

The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present).

Information regarding the weight in the ready-to-drive state can also be found in the technical specifications for our motorhomes and vans, as well as in our configurator.

It is important to note that the weight in the ready-to-drive state is a value calculated in the type approval procedure, which is subject to legally permissible fluctuations of up to $\pm 5\%$.

Since these fluctuations impact the remaining payload of the individual vehicle, the occurrence of legally permissible fluctuations must be factored in during the configuration and selection of packages and special equipment.

Example: In the technical specifications, the weight in the ready-to-drive state for the floor plan you have chosen is stated as 2,910 kg. This calculated value is subject to legally permissible fluctuations of $\pm 5\%$, i.e. ± 146 kg. The weight in the ready-to-drive state of the individual vehicle can therefore range from 2,764 kg to 3,056 kg.

We also list the legally permissible fluctuations in the technical specifications for our motorhomes and vans, as well as in our configurator as an additional text in brackets.

3. The weight of the passengers

The weight of the passengers is calculated from the number of belt-restrained seats defined by the manufacturer and is set at a nominal 75 kg per seat, whereby the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

The number of belt-restrained seats can be found in the technical specifications for our motorhomes and vans, as well as in our configurator. Please note that these numbers represent the highest possible number of belt-restrained seats for the series-version floor plan in question. The number of belt-restrained seats can however be reduced by the selection of packages and special equipment, or it can make an increase in the vehicle's load capacity necessary.

4. The actual weight of the vehicle | Packages and special equipment

The actual weight of the vehicle refers to the weight of the vehicle in the ready-to-drive state plus the packages or special equipment installed at the factory and is listed under point 13.2 of the certificate of conformity (CoC). This figure does not include the special equipment or other accessories that are added by a retailer or by you personally after delivery of the vehicle from the factory.

It should be noted that the actual weight of the vehicle is also a calculated value, which may deviate from a value determined for your individual vehicle due to legally permissible fluctuations in the weight in the ready-to-drive state as a calculated value of the actual vehicle weight.

Information regarding the weights of the packages and special equipment available ex works for our motorhomes and vans can be found in our configurator and in the technical specifications.

5. Payload and minimum payload

The payload is the maximum load that a vehicle can carry and is calculated by subtracting the weight in the ready-to-drive state, the weight of the passengers and the weight of the packages and special equipment fitted ex works from the technically permissible overall weight.

Example:

Technically permissible overall weight	3,500 kg
Weight in the ready-to-drive state	- 2,910 kg
Weight of passengers (3*75 kg)	- 225 kg
Weight of packages / special equipment	- 100 kg
Payload	= 265 kg

The installation of packages and special equipment will accordingly always lead to a reduction in the payload. The maximum weights available for packages and special equipment for each floor plan are shown separately in the technical specifications for our motorhomes and vans and in our configurator.

For motorhomes and vans as Class M1 vehicles, compliance with a minimum payload, i.e. the minimum load that a vehicle can transport, is required by law. This minimum payload must not be undercut either when configuring a vehicle or during production and is calculated for our motorhomes and vans according to the following formula:

Minimum payload in kg $\geq 10 \cdot (n + L)$

Where: "n" is the maximum number of belt-restrained seats, plus the vehicle driver, and "L" is the total length of the vehicle in metres.

Example:

In the case of a motorhome with 4 belt-restrained seats and a length of 7 m, the minimum payload is 110 kg ($10 \times [4+7]$).

It is important to note that legally permissible fluctuations in the weight in the ready-to-drive state can increase the payload of the individual vehicle, but can also reduce it.

Example (as previously):

Technically permissible overall weight	3,500 kg
Weight in the ready-to-drive state (+4%)	- 3,026.4 kg
Weight of passengers (3*75 kg)	- 225 kg
Weight of packages / special equipment	- 100 kg
Payload	= 148.6 kg

In order to prevent such fluctuations from leading to a shortfall in the legally prescribed minimum payload, we have limited the maximum weight for packages and special equipment on the manufacturer's side based on the legally permissible fluctuations. Information regarding this can be found in the technical specifications for our motorhomes and vans, as well as in our configurator. This data also takes into account special equipment features of country variations / special models that do not form part of the series equipment.

If the configuration process for our motorhomes and vans leads to the upper limit for this as defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle.

In exceptional cases, despite a restriction of the weights for packages and special equipment, weighing at the end of the production line can reveal that the individual vehicle's minimum payload is undercut due to legally permissible fluctuations. In such cases, we will not ship the vehicle in question before compliance with the minimum payload is ensured through the removal of packages, special equipment or belt-restrained seats or the vehicle's load capacity is increased.

FOOTNOTES FOR TECHNICAL SPECIFICATIONS

1. The technically permissible overall weight (kg)

The technically permissible overall weight in a laden state refers to the overall weight defined by the manufacturer that the vehicle may not exceed when in drive mode.

2. The weight in the ready-to-drive state (series) (kg)

The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present). This represents a calculated value that is subject to legally permissible fluctuations of up to ± 5% (see additional text in brackets). Since these legally permissible fluctuations impact the vehicle's payload and therefore also the weights of the packages and special equipment that can be ordered, the occurrence of such fluctuations must be factored into the configuration process and the choice of packages and special equipment.

3. Permitted number of people with 3-point belts

The weight of the passengers is calculated at a nominal 75 kg per seat, whereby the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

4. Maximum weights for packages and special equipment

The maximum weights for packages and special equipment represent a value calculated for each floor plan with which we have restricted the weights for the packages and special equipment that can be ordered from the factory. This is intended to ensure that the legally prescribed minimum payload is complied with after the vehicle is shipped from the factory. If the configuration process leads to the upper limit for this defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle. Please note that the calculation of the maximum weights for packages and special equipment also takes into account the special equipment features of the selected country variation / the selected special model.

5. Fresh water tank size (l)

Please note that the capacity of the fresh water tank is significantly reduced in the drive position. If the payload of the individual vehicle is sufficient, it can be filled to its full capacity.

* The permissible gross train weight must be complied with | ** With 35H chassis | *** In the lower position, the reclining area can be extended to 1850/1750 x 1900 mm | **** In the lower position to 1,850 x 1,930 mm

FOOTNOTES FOR TECHNICAL SPECIFICATIONS

1. The technically permissible overall weight (kg)

The technically permissible overall weight in a laden state refers to the overall weight defined by the manufacturer that the vehicle may not exceed when in drive mode.

2. The weight in the ready-to-drive state (series) (kg)

The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present). This represents a calculated value that is subject to legally permissible fluctuations of up to ± 5% (see additional text in brackets). Since these legally permissible fluctuations impact the vehicle's payload and therefore also the weights of the packages and special equipment that can be ordered, the occurrence of such fluctuations must be factored into the configuration process and the choice of packages and special equipment.

3. Permitted number of people with 3-point belts

The weight of the passengers is calculated at a nominal 75 kg per seat, whereby the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

4. Maximum weights for packages and special equipment

The maximum weights for packages and special equipment represent a value calculated for each floor plan with which we have restricted the weights for the packages and special equipment that can be ordered from the factory. This is intended to ensure that the legally prescribed minimum payload is complied with after the vehicle is shipped from the factory. If the configuration process leads to the upper limit for this defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle. Please note that the calculation of the maximum weights for packages and special equipment also takes into account the special equipment features of the selected country variation / the selected special model.

5. Fresh water tank size (l)

Please note that the capacity of the fresh water tank is significantly reduced in the drive position. If the payload of the individual vehicle is sufficient, it can be filled to its full capacity.

* The permissible gross train weight must be complied with | ** With 35H chassis | *** In the lower position, the reclining area can be extended to 1850/1750 x 1900 mm

DAVIS TRENDSTYLE FEATURE RANGE

DAVIS TRENDSTYLE - FEATURES

TRENDSTYLE INTERIOR WITH:

- » 140 HP engine
- » 35L chassis
- » Isofix (excluding 540)
- » 4 kW diesel heating
- » Elegant, bright interior features
- » Protective covers in the super-structure upholstery for the driver and passenger seat
- » Slatted frame for fixed beds
- » Midi-Heki
- » Skylight roof hood (excluding DA 540)
- » Refrigerator 70 to 84 litres (depending on floor plan)
- » Washroom window (excluding DA 540)
- » Table with table extension
- » Heated and insulated waste water tank
- » Series upholstery "Laguna"
- » Wall units with green appliqués

DAVIS LIFESTYLE FEATURE RANGE

DAVIS LIFESTYLE - FEATURES

INTERIOR LIFESTYLE WITH:

- » 140 HP engine
- » 35L chassis
- » Isofix (excluding 540/600/610)
- » 4 kW diesel heating
- » Elegant, bright interior features
- » LED ambient lighting
- » Mineral kitchen worktop
- » Metallic look logo trim in the kitchen unit
- » Folding table top
- » Additional wall unit above the rear doors (for DA 590/600/620)
- » Side storage compartment in the kitchen unit (for DA 590/591/620/630)
- » Window on left side in the rear (for DA 590/620/630)
- » Body-flush frame windows

FEATURE PACKAGES INCLUDED IN THE COUNTRY-SPECIFIC FEATURES

DEXTER AND DAVIS LIFESTYLE ALL-INCLUSIVE CONCEPT PACKAGE*

PACKAGE FEATURES:

- » Steering wheel controls
- » External lighting
- » Painted front bumper
- » Black skid plate
- » Dimming system for the driver's cab
- » Door mosquito screen
- » Leather steering wheel
- » 16" aluminium rims
- » Captain's chair seats
- » Radio preparation and DAB antenna
- » Chrome panels for ventilation slots
- » Rear-view camera
- » Fog lights with cornering light
- » Traction Plus

DAVIS TRENDSTYLE PLUS PACKAGE*****

PACKAGE FEATURES:

- » 140 HP Citroën engine (for DA 590, 591, 595, 600)
- » 16" aluminium rims
- » "Lanzarote Grey" paintwork
- » Driver's cab dimming system
- » Canopy
- » Rear-view camera
- » DAB antenna
- » Door mosquito screen
- » Electric step
- » External lighting
- » Winter package (insulated and heated waste water tank, insulated water pipes in the exterior)
- » Radio incl. DAB+
- » Captain's chair seats
- » Leather steering wheel
- » Steering wheel controls
- » Chrome panels for ventilation slots
- » Traction Plus

DUNCAN VIVA PACKAGE**

PACKAGE FEATURES:

- » Front and rear bumpers painted in the vehicle colour
- » Electrically adjustable heated exterior mirrors with integrated turn signals
- » 17" aluminium rims Ford Tourneo Custom
- » Seat heating for driver and passenger seat
- » Automatic air conditioning in front and rear
- » Passenger seat can be manually adjusted (4 positions)
- » Thermal insulation glazing
- » Side windows, with medium tinting starting at the 2nd row of seats

DEXTER FORD ALLROAD PACKAGE***

PACKAGE FEATURES:

- » Electric step
- » Rear-view camera with display in the rear-view mirror
- » Lithium battery & DC-DC chargers
- » Dimming system in the driver's cab
- » Matt-black 16" alloy wheels
- » Door mosquito screen

OPTIONAL FEATURE PACKAGES

DEXTER AND DAVIS LIFESTYLE CONCEPT PLUS PACKAGE*

PACKAGE FEATURES:

- » Electrical retraction of external mirrors
- » Parking sensors
- » Inductive charging cradle
- » Blind spot assistant with rear cross traffic alert system
- » Automatic air conditioning
- » 7" digital instrument panel

DEXTER AND DAVIS FIAT DRIVING ASSISTANCE PACKAGE****

PACKAGE FEATURES:

- » Lane departure assistant
- » Rain and light sensor
- » Traffic sign recognition
- » Intelligent speed assistant
- » Pedestrian detection
- » Fatigue detection

DUNCAN DRIVING ASSISTANCE PACKAGE**

PACKAGE FEATURES:

- » Navigation
- » Adaptive cruise control
- » BLIS blind spot assistant with rear cross traffic alert system, incl.
- » Reverse brake assist system

DEXTER FORD DRIVING ASSISTANCE PACKAGE***

PACKAGE FEATURES:

- » Camera and radar-based pre-collision assist system
- » Lane departure assistant and warning system
- » Traffic sign recognition system
- » LED downlight on the rear door
- » Parking assistance (front)
- » Front fog lights
- » Adaptive cruise control
- » Electrically adjustable and folding exterior mirrors, heated
- » Navigation
- » Reverse brake assist system
- » 360° camera
- » BLIS blind spot assistant with rear cross traffic alert system

All of the information in this brochure relates to the products listed herein and does not apply to any other products of Eura Mobil GmbH. The models illustrated in this brochure show the features available in Germany. They may also contain special features and accessories that are not included with the standard scope of delivery. Due to legal regulations, differences from the model variations described here and equipment featured may be necessary in certain countries. Latest update: In light of the current supply chain problems, the brochure also shows some models from the 2025 season that may differ in terms of their feature details from the 2026 season models. Please ask your Karmann Mobil dealer about the exact scope and range available of model-specific and model-neutral features. Subject to errors and changes in design, equipment and special features.

With regard to installations and conversions, please note / comply with the manufacturer specifications and the legal pro-

visions as defined in the German Road Traffic Licensing Regulations (StVZO) and the German Road Traffic Regulations (StVO).

We work constantly to improve the quality of our vehicles, which is why we reserve the right to make changes to their features / optional features in this model year as well. The latest current features, optional features and package contents can therefore only be viewed in the online configurator at www.karmann-mobil.de/en/.

The publication of this brochure renders all previous catalogues invalid.
